

ABOUT THE INNOVATION PRIZE PROGRAM

The Milken Institute and the Motsepe Foundation have partnered on a multi-year initiative to focus global innovators and entrepreneurs on developing technological solutions that accelerate progress towards the United Nations' Sustainable Development Goals (SDGs). The Milken-Motsepe Innovation Prize program is a series of technology prize competitions that address some of the world's most pressing challenges—such as access to food, energy, housing, and education—with a spotlight on the African continent.

- **Scalable, tech-based solutions.** The prize program mobilizes significant financial and human capital through its inclusive and integrated approach to access and mobility for innovators and startups.
- **Cultivating and supporting a global community of entrepreneurs.** The inclusive ethos of the prize program provides an equal opportunity for success—agnostic to age, status, education, location, or past achievements.
- **Global data-driven insights.** There will be significant new data captured and ideas generated from the range of innovations and field tests. Prizes are useful tools to accelerate data capture for evidence-based research.

PARTNERSHIP OPPURTUNITIES

There are numerous opportunities to help support these bold innovators and the success of the prize program. These include: providing expertise and mentoring, in-kind support for testing, media opportunities, judging capabilities, and helping with team recruitment or sponsorship.
